Data Visibility is Necessary to Eliminate Energy Waste

Energy costs have a direct impact on the bottom line of every business. Forward-looking executives and building managers are looking at ways to address this growing problem and stop the drain on profits.

But did you know there are some practical steps everyone can take to help reduce energy usage and consumption today? According to the EPA, 30 percent of all energy used in buildings is either wasted or inefficiently used.

How do you stop this? You need to know where to look. **Click here** to learn how you can leverage real-time information to reduce energy waste in your buildings.

Gain Control of Building Operating Expenses

Energy use comprises about a third of the operating expenses for office buildings. It is the largest controllable operating expense for most businesses. For the building owner or tenant, controlling these costs is difficult because you have little visibility into your energy cost drivers.

Click here to learn how to transform your organization's energy consumption and management.
