

Solar 101 Panel Discussion

The importance of data transparency

February 16, 2011

Govi Rao
President & CEO
Noveda Technologies, Branchburg, NJ

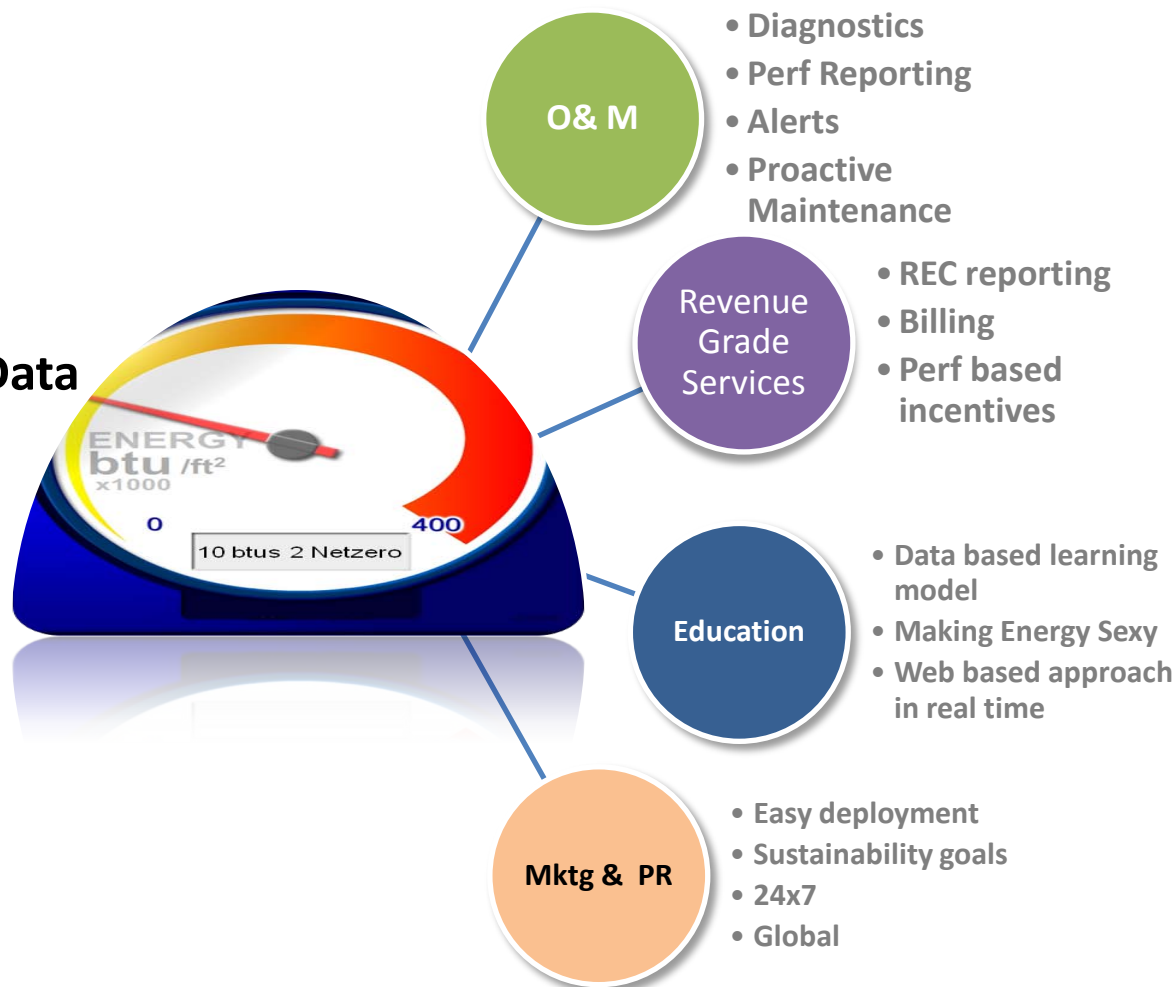

Key Challenges

- Highly distributed generation – geographically dispersed
- Multitude of small plants
- Diverse & emerging set of technologies
- Narrower Operating Profit margins
- Even narrower tolerance for error
- Inaccurate and delayed diagnosis can be devastating

Can we afford this exposure ?

We don't have to...

**With Real Time Data
Transparency**

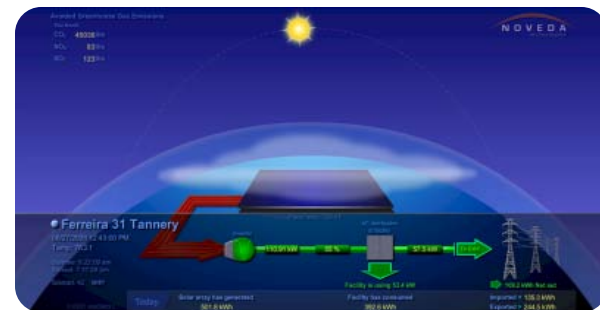

Jump start your journey to Net-zero...

- PPA Providers can ensure production of their arrays
- Track SRECs
- Identify and promote emission reductions at any point in time
- Prove the results of your PV investment in “Real Time.”

With Real Time Data....

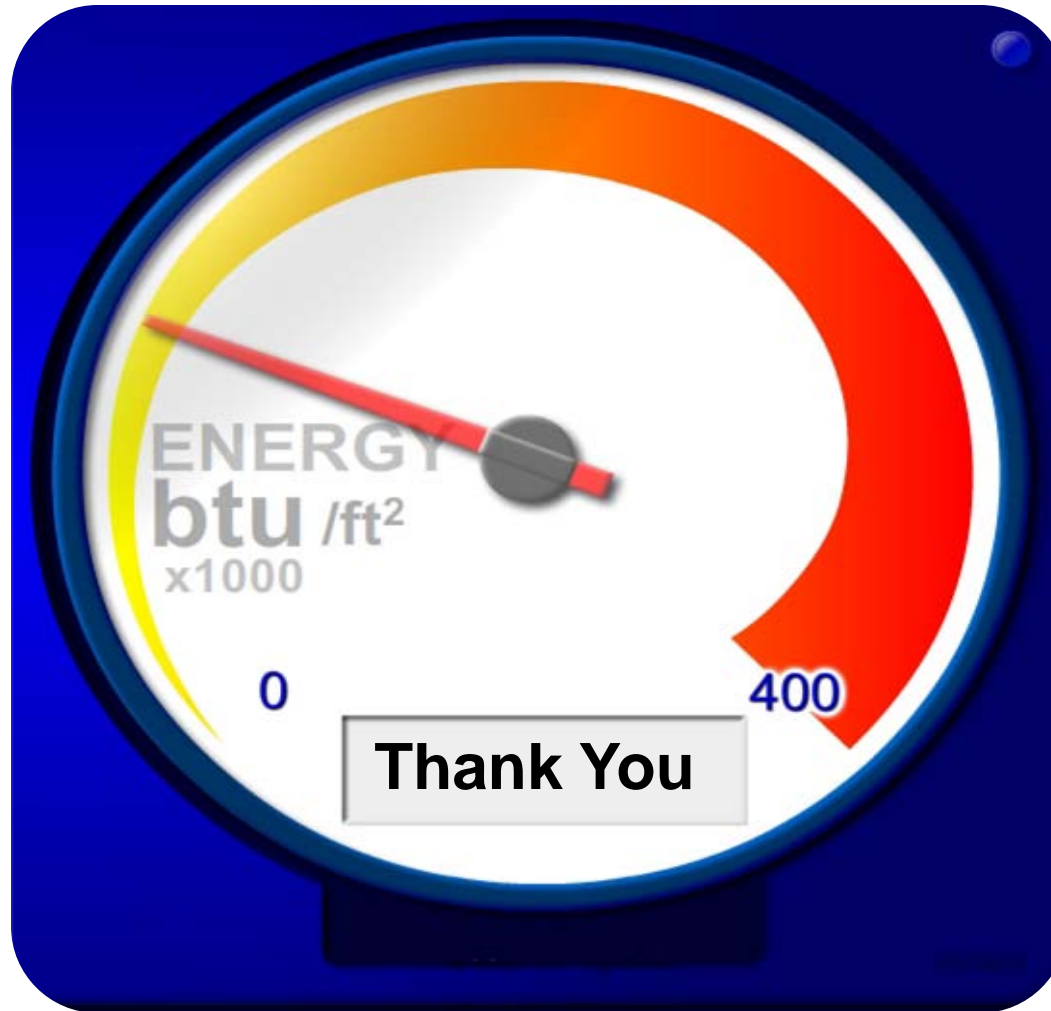

February 16, 2011

Making The Smart Grid A Reality

- ✓ Monitoring the two-way digital controls
- ✓ Managing the aggregated network of electrical suppliers and technologies
- ✓ Instantaneous network diagnostics
- ✓ Enhanced reliability - Six Sigma or better

Thank You

Formula for Success

Energy Efficiency (EE) + Renewable Energy (RE) + Monitoring & Visualization (MV) = Sustainable High Performance Buildings
